

PRESS RELEASE – June 30th 2016

German Imaging Technologies (GIT) launches its new product packaging.

German Imaging Technologies (GIT), a leading manufacturer and supplier of OEM-document printing solutions, releases its new product packaging.

“The new packaging reflects GIT longstanding commitment to both premium quality and environment sustainability. Over the 17 years of existence of GIT, we mastered the art of remanufacturing monochrome and color toners, while saving on average, per cartridge, 6 kilograms of CO₂ and 1.5 kilogram of waste from being dispersed into the atmosphere and the landfills. It fully supports the purpose of the company” Dr. Sassan Dieter Shahidi, founder and Chief Executive Officer said.

Founded in 1999, the company has been recognized by IDC as the leading OEM-alternative supplier from 2007 and continues to help more than 2,000 customers in 15 countries across the Middle-East and Africa by providing premium remanufactured toner cartridges, printers, leasing, service contracts and managed print services. The company has embarked on a regional expansion strategy and prides itself in delivering a compelling turn-key printing solution and the highest levels of service in a very cost effective manner.
